Dear Ms. Streit,

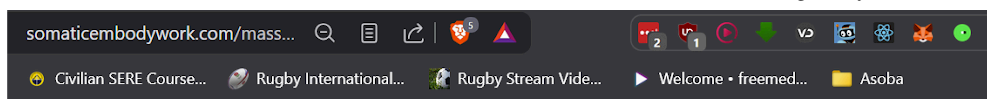

This letter serves as formal notice regarding documented violations of professional licensing laws through your practice.

Documented Interstate Practice Without Authorization:

Bank records from September 2021 through August 2025 show regular \$120 payments for remote sessions delivered to clients in California and Missouri. Your North Carolina LMBT license does not authorize practice in these states, nor does it permit remote psychological counseling under any circumstances.

Specific Violations:

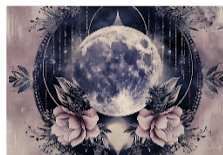

1. Unlicensed Practice of Psychology: Marketing and delivering psychological services without appropriate credentials
2. Interstate Practice Without License: Providing services in California and Missouri without authorization
3. Exceeding Scope of Practice: Conducting remote "therapy" sessions that exceed massage therapy scope
4. Unqualified Diagnosis: Client reports indicate you provided psychological assessments and diagnoses without qualifications

[Book A Session](#)

Somatic Womb Healing

Using CranioSacral Therapy, Somatic Experiencing®, shamanic healing practices, gentle massage, Reiki and advanced energy medicine techniques, these sessions are designed to release the energy and stories held in your pelvis and womb space. This work is designed to help you reclaim your vitality, heal the relationship with your body and sensuality, and sense of embodiment.

Sessions are 90 minutes in length.

[Book A Session](#)

Conditions I Can Help You With

- Neck Pain
- Back Pain
- Sciatica
- Chronic Headaches and Migraines
- Limited Range of Motion
- TMJ
- Fibromyalgia
- PTSD
- Recovery From Accidents and Injuries
- Autoimmune Related Issues
- Chronic Fatigue
- Chronic Stress and Anxiety
- Insomnia
- Hip and Pelvic Pain
- Recovery From Surgery
- Chronic Pain
- and many other conditions and disharmonies

The Board's position that advertising treatment for PTSD under massage therapy credentials is 'fine' appears to contradict North Carolina General Statute § 90-270.2 defining psychology practice. Please clarify how treating DSM-5 diagnosed conditions falls within massage therapy scope

Documented Harm:

Your unlicensed practice coincided with:

1. Client abandonment of licensed psychiatric care
2. Deterioration of parental judgment affecting minor children
3. Financial exploitation (thousands in fees while client claimed inability to afford licensed care)
4. Enabling of harmful behaviors through unqualified "therapeutic" frameworks

Regulatory Status:

Evidence has been submitted to:

North Carolina Board of Massage & Bodywork Therapy
North Carolina Psych Board
Missouri Psych Board
California Department of Consumer Affairs
Federal authorities (due to interstate commerce elements)

Recommendation:

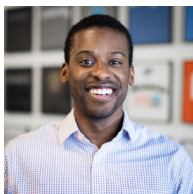

Cease all psychological services immediately and limit practice to licensed scope. Continued violations with documented evidence present significant civil and criminal liability exposure.

This constitutes professional notice of documented violations currently under regulatory review.

Note: Your website now indicates relocation to Colorado. Interstate movement during active regulatory investigations may be viewed as evasion. Colorado licensing requirements remain applicable.

Sincerely,

--

Shingi Samudzi
